### GLOBALDOC SOARS HIGHER INTO THE CLOUD

ATLANTA, May 13, 2015 - GlobalDoc announces enhanced automation and cloud-based access to the company's wide range of translation services offerings. New technical developments are propelling the company ahead through strategic investments into hardware infrastructure and LangXpert® software features.

GlobalDoc recently completed transformation of its Information Technology infrastructure by consolidating all hardware and software within the world class, globally recognized QTS Data Center located in Suwanee, Georgia USA. With 370,000 square feet of data center and office space in the north suburbs of telecommunications hub Atlanta, the QTS Data Center provides core data center services including Colocation and Cloud Support Services - as well as providing 24x7x365 monitoring and support. The center incorporates the latest in security, environmental controls, connectivity, and fire detection and protection.

GlobalDoc's worldwide client, employee, and translator base now have the option to work in any location with internet access by utilizing GlobalDoc's LangXpert software suite of applications. Combining automation improvements, physical infrastructure enhancements, and continued investments into LangXpert software development provides everyone working with GlobalDoc increased process efficiencies and cost savings in any required language.

**ABOUT GLOBALDOC** – GlobalDoc is the premier provider of translation, localization, and software development services for multinational companies worldwide. With operations in the United States, United Kingdom, India and Singapore, our proven ability for over 20 years working within the translation industry allows GlobalDoc to help client's succeed in the global business environment.
